

Restaurant Grease Traps & Drains

Product Description

BioBug GC minimizes hydrogen sulfides and build up of sludge, thereby reducing odors, fecal matters, and grease compounds. BioBug GC dissolves gradually over 10 to 20 days (dependent upon flow rate) allowing for continuous waste treatment.

BioBug GC is an improved biological product, specifically formulated and packaged for use in restaurants where the water temperatures are higher. To assure optimal performance of these organisms, under the toughest conditions, they are produced and blended together with "high potency" nutrients and stimulants.

The product also contains specialty penetrants and surfactants which loosen and digest heavy grease deposits, thereby assisting in their biodegradation.

Grease Control in Floor Drains and Traps

BioBug GC is made and packaged specially for use in restaurant applications to maximize performance on grease digestion.

Specifications

Form:	Solid
Color:	Green
Shelf life:	2 years
Non-Bacteria Content:	Cleaning & Water Softening Agents, Fragrance, Perfume

Benefits of BioBug GC:

- Keep drain lines clean
- Reduce grease build-up headaches
- Prevent emergency blockages
- Save on-line jetting
- Lower grease disposal costs
- Reduce or eliminate odors
- Last longer in hot water flow

Storage

DO NOT FREEZE! Store in a cool dry location. Do not inhale dust, avoid excessive skin contact. SEE Safety Data Sheets.

Application Instructions

Place 1 or 2 blocks of GC in each floor drain leading to the grease trap. For optimal results, replace when the blocks have dissolved.

SLOW RELEASE
Disperses bacterial
product as it dissolves!

1. Remove BioBug GC from carton.
2. Place into floor drain leading to grease trap.
3. Replace BioBug GC as needed with new product.
